Percentiles Compared to Student Sample

Scoring and Interpretation Information

Results consist of a total raw score which is between 0 and 220, and 6 subscale scores:

- Contaminations (12 items, scores between 0 and 48)
- Checking (6 items, scores between 0 and 24)
- Obsessions (12 items, scores between 0 and 48)
- Hoarding (7 items, scores between 0 and 28)
- Just right (12 items, scores between 0 and 48)
- Indecisiveness (6 items, scores between 0 and 24)

In addition to the raw scores, results are presented in terms of percentile ranks compared to an OCD group, anxious/depressed group (AD), community adults (CA), and a student (S) sample. Percentile ranks for the community adults group should be interpreted with caution as the validity group has a low sample size (n=39). High percentiles indicate high levels of symptoms compared to comparison group.

Client Responses

		Not at all	A little	Some	Much	Very much
1	I feel compelled to check letters over and over before mailing them.	0	1	2	3	4
