Interpretive Text

Questions 9, 14, 20, 22, 24, 26, 31, 36, 40 and 55 were not completed.
--

Scoring and Interpretation Information

A list of past and current symptoms are provided which are used to determine target obsessions and compulsions in treatment. A score between 0 and 110 is given where the patient receives 1 point for past symptoms and 2 points for current symptoms. This score is not the primary method for interpretation and looking at the specific answers provides the most meaningful clinical picture.
